

TOUCH ID

MFCU Mobile App

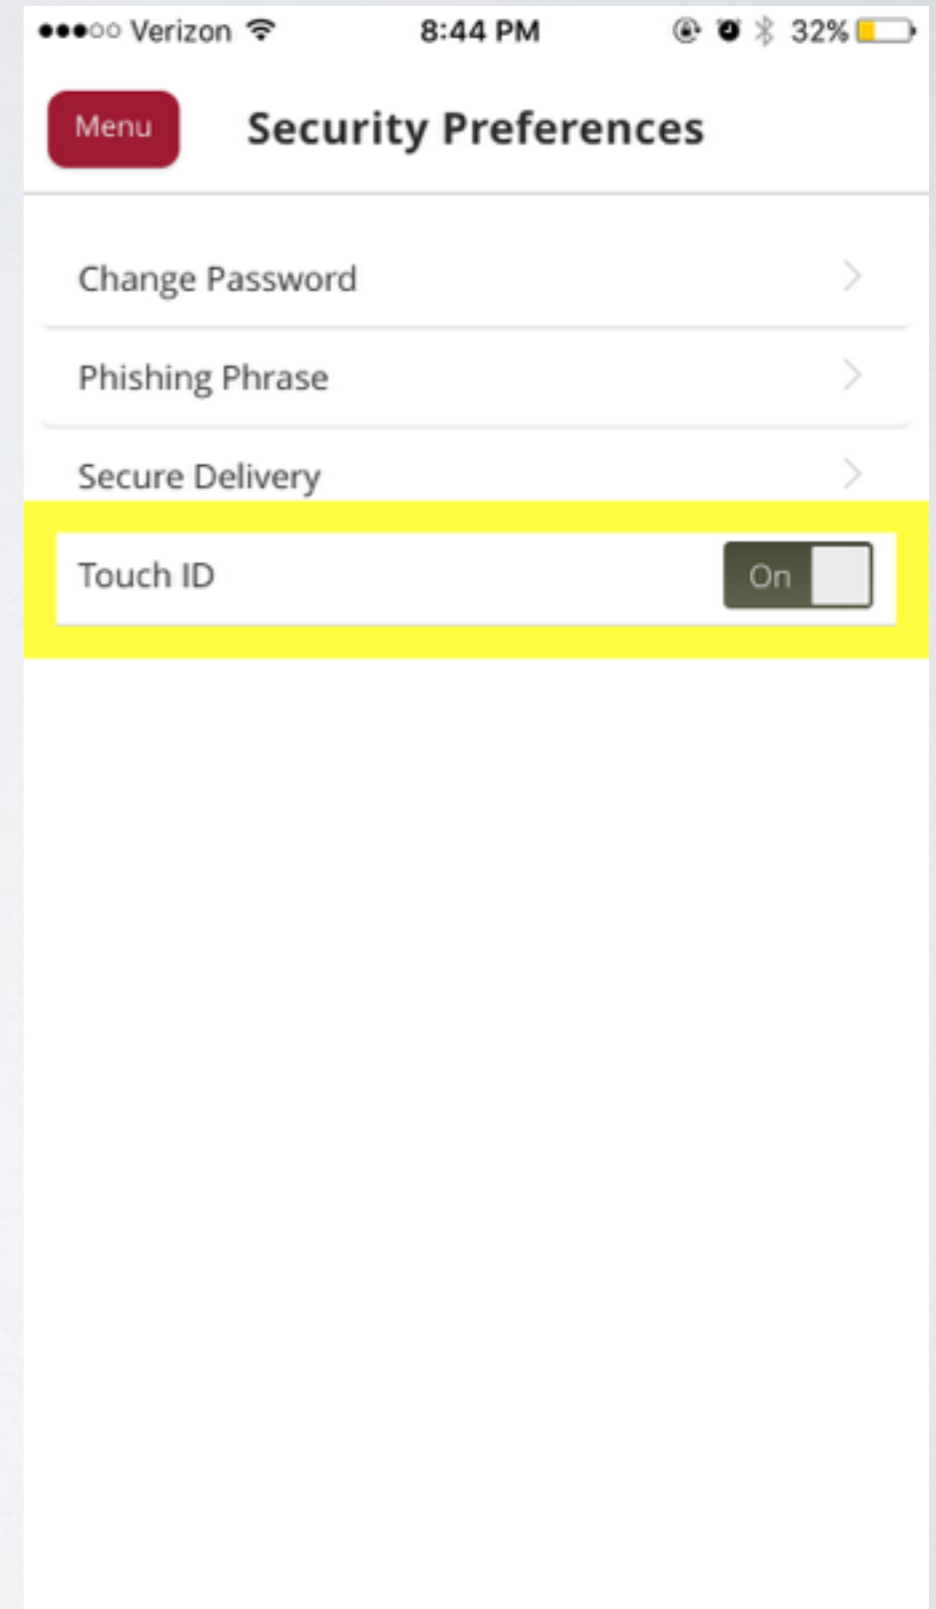

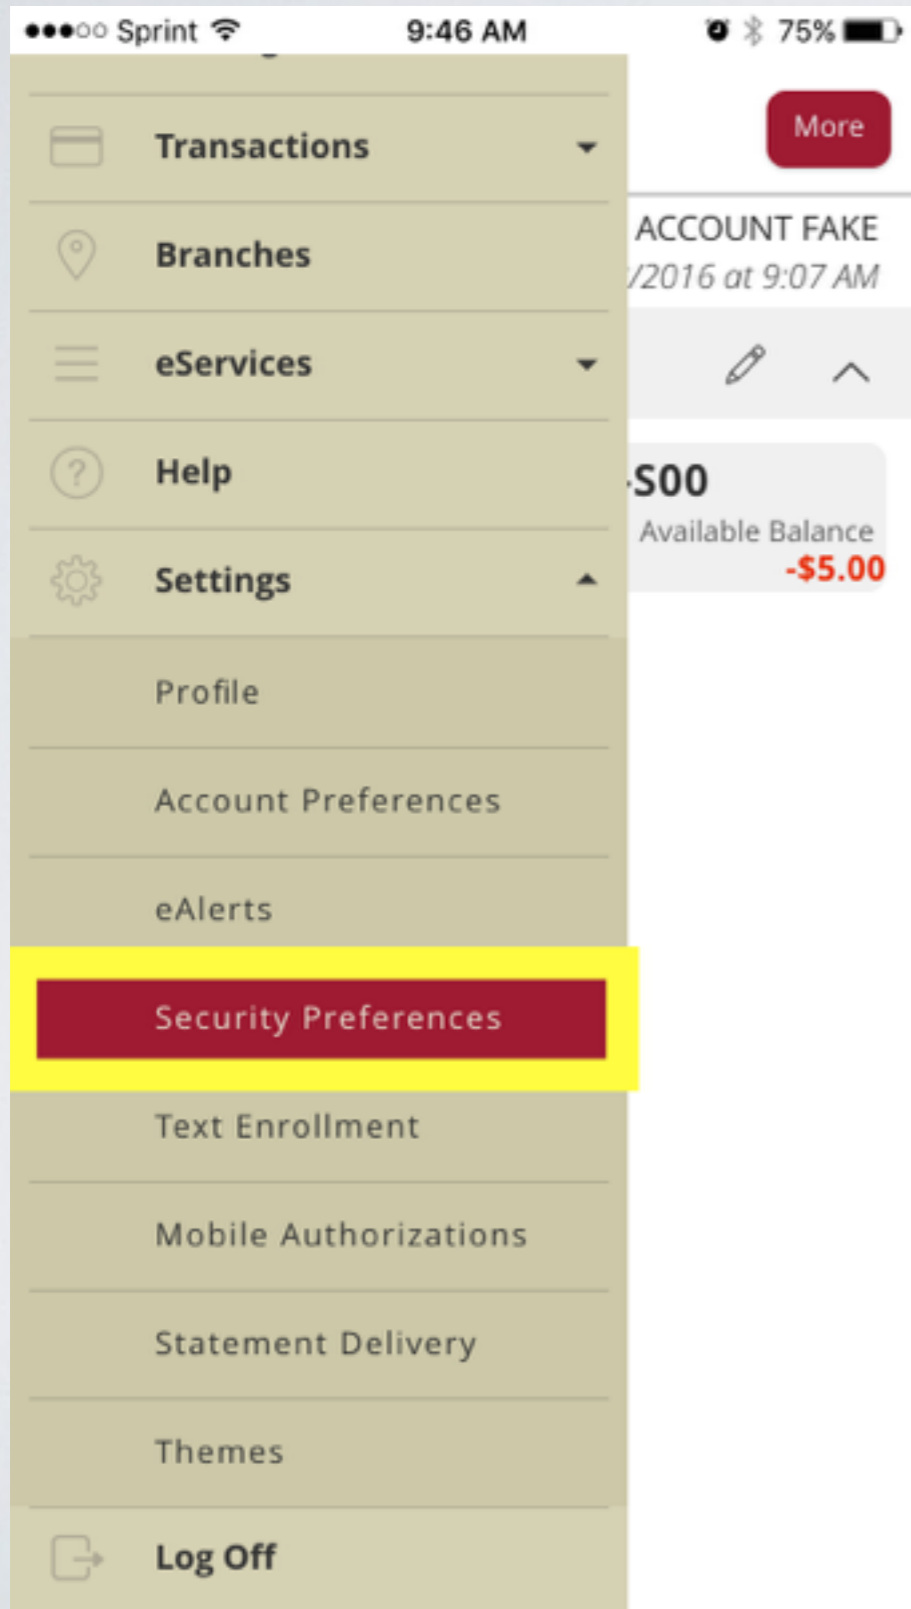

TOUCH ID

- **Who will have this capability?**
 - iPhone users with updated software of iOS 8 and later
 - iPhone users with an iPhone 5 and later
- **How does a member turn on this feature?**
 - Ensure that their Touch ID on their iPhone is turned on
 - Log into the Mobile Banking app
 - Tap on 'Settings' > 'Security Preferences'
 - Toggle the Touch ID button to the 'On' Position
 - Review the Touch ID details and click 'continue'
 - Enter Login ID and Password. Select 'Authorize'
 - Place finger or thumb used for your device on the 'Home' button.

Touch Authentication

What Is This Feature?

This feature allows you the option to authenticate into your Mobile Banking session using Apple's Touch ID fingerprint instead of your login ID and password.

By opting into this feature, you will be prompted to place your registered fingerprint on the Touch ID sensor of your iPhone or iPad.

Feature Enablement

Touch Authentication is only available for users who have a Touch ID enabled iPhone or iPad and have registered their device for use with Mobile Banking.

In the event that you disable the Touch ID feature from your Apple device, you will be required to use the standard login method with your login ID and password.
